1. Reporting entity and going concern:

Monarques Resources Inc. ("The Company"), incorporated on February 16, 2011 under the *Canada Business Corporations Act*, is engaged in the acquisition and exploration of mining properties. Its stock is trading on the TSX Venture Stock Exchange under the symbol MQR. Its activities are in Canada. The Company is a company associated with Nemaska Lithium Inc. (Nemaska) (formerly Nemaska Exploration Inc.), a company that trades on the TSX Venture under the ticker NMX and owns 47.2% of the share capital of the Company.

The Company has not yet determined if the properties contain ore reserves that are economically recoverable.

Although the Company has taken steps to verify title to mineral properties in which it has an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

The recoverability of amounts shown for mining properties and related exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof. As at the date of the financial statements, management determined that the net carrying value of mining properties represents the best estimate of their net recoverable value. This value may nonetheless be reduced in the future.

The funds available to the Company at the end of the quarter are sufficient to complete its exploration budget planned for the current fiscal year of 2011-2012. However, the Company will have to seek additional funds before the end of the current fiscal year in order to secure the funds needed for its 2012-2013 budgets for exploration and for general and administrative expenses.

The address of the head office of the Company is 450, rue de la Gare du Palais, 1st floor, Québec (Québec), Canada, G1K 3X2.

2. Basis of preparation:

(a) Statement of compliance:

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to the preparation of interim financial statements, IAS 34, *Interim Financial Reporting*, as published by the International Accounting Standards Board ("IASB").

The accounting policies applied in these condensed interim financial statements are based on IFRS issued and outstanding as of February 27, 2012, the date on which the Board of Directors approved the condensed interim financial statements. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the period ending June 30, 2012 could result in restatement of these condensed interim financial statements.

2. Basis of preparation (continued):

(a) Statement of compliance (continued):

These condensed interim financial statements should be read in conjunction with the Company's annual audited financial statements for the year ended June 30, 2011.

3. Significant accounting policies:

These condensed interim financial statements have been prepared following the same accounting policies used in the condensed interim financial statements for the period ended September 30, 2011.

The accounting policies have been applied consistently to all periods presented in these condensed interim financial statements, unless otherwise indicated.

The accounting policies have been applied consistently by the Company.

(i) The net book value of the shares issued is presented net of the fair value of warrants amounting to $5,384 ($297,192 as at June 30, 2011 and netted against the share capital paid in cash).

(ii) The net book value of the flow-through shares is presented net of the liability related to flow-through shares of $800,000 that was recorded when the flow-through shares were issued during the initial three-month period ended June 30, 2011. No additional flow-through shares financing occurred during the current period. As at December 31, 2011, the balance of the liability related to flow-through shares was $277,671. An amount of $522,329 has been recognized as other income related to flow-through shares in the condensed interim statement of comprehensive loss for the six-month period ended December 31, 2011, representing the portion of the liability related to the increase in the exploration and evaluation assets during the period in relation with the total flow-through shares financing.

During the period, the Company issued 100,000 units consisting in 100,000 common shares and 100,000 warrants as part of the consideration for the acquisition of three (3) mining claims assigned to the Valiquette property. The proceeds of the common shares and warrants issued is evaluated at $26,000, of which, $20,616 was attributed to the common shares and $5,384 to the warrants.

6. Share capital (continued):

During the period, the Company also issued 50,000 common shares evaluated at $12,000 as part of the consideration for the acquisition of ten (10) mining claims assigned to the Arques property.

7. Share-based payments and warrants:

The shareholders of the Company approved a share purchase option plan (the "plan") whereby the Board of Directors may grant to employees, officers, directors and suppliers of the Company share purchase options to acquire common shares in such numbers, for such terms and at such exercise prices as may be determined by the Board of Directors. The exercise price may not be lower than the market price of the common shares at the time of grant.

The plan provides that the maximum number of common shares in the capital of the Company that may be reserved for issuance under the plan shall not be greater than 10% of the issued shares in the capital of the Company being outstanding from time to time. The maximum number of common shares which may be reserved for issuance to any optionee may not exceed 5% of the outstanding common shares at the time of vesting and may not exceed 2% of the outstanding common shares for consultants and investors relation representative. These options are non-assignable and non-transferable unless by legacy or inheritance and will expire no later than five years after being granted. The vesting period for the share purchase options and warrants varies from an immediate grant up to 24-month vesting period.

(a) Warrants, other than those granted to brokers:

8. Contingencies:

(a) The Company's operations are governed by laws and regulations regarding environmental protection. Environmental consequences are hardly identifiable, in terms of level, impact or deadline. At the present time and to the best knowledge of its management, the Company is in conformity with the laws and regulations. Restoration costs will be accrued in the financial statements only when they will be reasonably estimated and will be charged to the earnings at that time.

(b) The Company is partly financed by the issuance of flow-through shares. However, there is no guarantee that the funds spent by the Company will qualify as Canadian exploration expenses, even if the Company has committed to take all the necessary measures for this purpose. Refusals of certain expenses by tax authorities would have negative tax consequences for investors.

9. Commitments:

Monarques' 100% owned properties of Lac Levac, Lac des Montagnes and Lac Arques have been restructured after the spin-off transaction. The Company restructured these three properties into seven (7) properties to reflect upon different geological settings found on them and to facilitate future reporting requirements that will comply with the updated National Instrument 43-101 rules. These changes are being reflected in the following commitments:

(a) Arques / Bourier / Lemare / Nisk (previously Lac Arques):

Upon the acquisition of the properties, the Company took in charge 100% of an agreement on a group of 396 claims included in the Lac Arques property in the province of Quebec. Upon the properties restructuration, these 396 claims related to this commitment were assigned as follows: 109 claims to the Arques property, 142 claims to the Bourier property, 98 claims to the Lemare property and 47 claims to the Nisk property.

As part of this agreement, the Company has agreed to pay to one of the seller a maximum of $1,000,000, conditional on the achievement of certain stages of works and results on the claims acquired under the Lac Arques Purchase and Sale Agreement, which are defined as follows:

- $50,000 if and when the Company will have completed exploration work corresponding to a minimum amount of $2,500,000 on the property;
- $150,000 if and when the Company will have completed exploration work corresponding to a cumulative minimum amount of $5,000,000 on the property;
- $300,000 upon obtaining an independent pre-feasibility study; and
- $500,000 upon obtaining an independent feasibility study confirming that the property can support commercial production.

As at December 31, 2011, cumulative exploration expenses totalling $2,715,951 ($2,037,224 as at June 30, 2011) were done on the properties, of which, $1,911,404 is included in the acquisition costs of the properties. This cumulative amount must be taken into consideration in the calculation of the minimum exploration work to be carried out to reach the trigger level of payments. During the period, an amount of $50,000 was recorded in the accrued liabilities in relation to the Company reaching the $2,500,000 milestone in exploration work for this commitment.

The payment of a 3% NSR to the initial sellers under the Lac Arques Purchase and Sale Agreement in case of a commercial production of all metals extracted from the or part of the 396 claims. However, the Company shall have the option at all time and until the expiration of a period of 3 months following the official production statement, to repurchase 1% NSR from the vendors, proportional to their interest therein subject to the payment of an amount of $1,000,000 payable in two equal and consecutive instalments, the first instalment being payable upon the date of exercise of the option to repurchase part of the NSR and the second at the latest 90 days following the date of payment of the first instalment.

9. Commitments (continued):

(b) Arques / Lemare / Nisk (previously Lac Levac):

Upon the properties restructuration, 150 claims related to this commitment of the Lac Levac property were assigned as follows: 1 claim to the Arques property, 83 claims to the Lemare property and 66 claims to the Nisk property. Pursuant to a net smelter return agreement dated January 15, 2010 (the “Net Smelter Return Agreement”), the initial seller has retained a 2% NSR, of which a 1% NSR can be repurchased by the Company for an amount of $1,000,000 within the first three years.

In addition, the Company has undertaken, should it receive a good-faith offer from a third-party for any of the Nisk property claims, not to dispose of any such Nisk claims without having entitled the initial seller to purchase such Nisk claims at the price of such offer, pursuant to a right of first refusal agreement dated January 15, 2010 (the “Right of First Refusal Agreement”).

(c) Caumont / Duval / Valiquette (previously Lac des Montagnes):

From the 279 claims forming the Lac des Montagnes property, 197 of them have been designated before November 2008 as being subject to a 2% NSR, of which a 1% NSR can be repurchased by the Company for an amount of $1,000,000 within the first three years to be paid in favor of the initial seller. Upon the properties restructuration, these 197 claims related to this commitment were assigned as follows: 19 claims to the Caumont property, 56 claims to the Duval property and 122 claims to the Valiquette property. Furthermore, the initial seller keeps a right of first refusal should the Company receive a good-faith offer from a third-party for any of the 197 claims to purchase such claims at the price of such offer.

In addition, pursuant to an acquisition agreement dated October 28, 2010 for 24 claims forming part of the Lac des Montagnes property (part of the Caumont West block) these claims are subject to a 1.5% NSR payable in favor of the initial seller. 1% of that NSR can be repurchased at all time and until the expiration of a period of 3 months following the official production statement, subject to the payment of an amount of $1,000,000 payable in two equal and consecutive instalments, the first instalment being payable upon the date of exercise of the option to repurchase part of the NSR and the second at the latest 90 days following the date of payment of the first instalment.

(d) Arques:

On September 28, 2011, the Company accounted the acquisition of ten (10) mining claims known as “the North Rupert Block”, which were held by the seller. These mining claims are located in the Province of Québec and are enclosed in the Arques property owned at 100% by the Company.

9. Commitments (continued):

(d) Arques (continued):

On October 12, 2011, the Company paid to the seller $5,000 in cash and issued 50,000 common shares in the capital of the Company as a consideration for the claims acquired. These common shares are subject to a 4-month hold period.

Also, the Company has agreed to pay the seller 1.5% NSR if any of the claims comprising the North Rupert Block are brought into production. The Company has the right, at any time, to purchase 0.5% of the NSR by paying the seller the sum of $500,000 in cash.

(e) Valiquette:

On July 14, 2011, the Company purchased three (3) mining claims located to the west of the Valiquette property. Conditional to reaching a certain number of meters of diamond drilling on the claims, the Company has also agreed to pay to the seller an additional amount of a maximum of $60,000 and to issue a maximum of 500,000 additional units, in equal portions of $15,000 and 100,000 units, every 3,000 meters of diamond drilling on the claims, starting from 3,000 meters. The exercise price of the warrants at the date of granting will be established as the weighted average price of the common shares on the TSX Venture Exchange, during the period of 30 calendar days following the reaching of said number of meters. This commitment is in force as long as the claims remain in good standing. Also, the Company has agreed to pay to the seller a 2% NSR on all metals from the acquired claims. The Company has the right, at any time until the expiration of the 3 month-period following the official production statement, to purchase 1% of the NSR by paying to the seller the sum of $1,000,000 in cash.

(f) Flow-through shares:

The Company is committed to incur exploration and evaluation expenses of $4,000,000 by December 31, 2012 and to transfer the tax deductions related to these expenditures to the subscribers of its flow-through share underwriting completed on June 10, 2011. As at December 31, 2011, the Company had funds reserved for exploration amounting to $1,388,355 ($4,000,000 as at June 30, 2011).

14. Earnings per share:

The warrants and share purchase options were excluded from the diluted weighted average number of common shares calculation since the Company is at loss and therefore, their effect would have been antidilutive.

15. Financial instruments and financial risk management:

Fair value of financial instruments

The carrying amounts of short-term financial assets and liabilities, which include cash and cash equivalents, taxes receivables and accounts payable and accrued liabilities approximate their fair values due to the immediate or short-term maturities of these financial instruments.

15. Financial instruments and financial risk management (continued):

Risk exposure and management

The Company is exposed to a certain amount of risks at different levels. The type of risk and the way the exposure is managed are described hereafter.

(i) Market risk:

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Interest rate risk:

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Cash equivalents bear interest at a fixed rate to 1.30% per year. In relation with those items, there is no exposure to fair value variation due to the fact that they are redeemable at any time. The other financial assets and liabilities of the Company do not represent interest risk because they are without interest. The Company does not use financial derivatives to decrease its exposure to interest risk.

Currency risk:

The Company is not exposed to currency fluctuations as all transactions up to now have occurred in Canadian dollars.

(ii) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations associated with its financial liabilities as they fall due.

The Company manages liquidity risk through the management of its capital structure, as outlined in note 16. It also manages liquidity risk by continuously monitoring actual and projected cash flows.

As at December 31, 2011, all of the Company's financial liabilities had contractual maturities of less than one year. As at December 31, 2011, the Company had $306,323 in cash and cash equivalents not reserved for exploration ($1,092,699 as at June 30, 2011) plus $419,015 in sales tax receivables ($93,882 as at June 30, 2011) to meet its financial liabilities and future financial liabilities from its commitments; and also had $1,388,355 ($4,000,000 as at June 30, 2011) of funds reserved for exploration.

15. Financial instruments and financial risk management (continued):

Risk exposure and management (continued)

(iii) Credit risk:

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's cash and cash equivalents. Financial instruments which potentially expose the Company to credit risk mainly consist of cash and cash equivalents. The credit risk on cash and term deposit is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies. Also, as the majority of its receivables are from the governments of Quebec and Canada in the form of sales taxes receivable, the credit risk is minimal.

16. Capital management:

There were no significant changes in the Company's approach to capital management during the current period compared with the prior year.

As at December 31, 2011, the capital of the Company consists of shareholder's equity amounting to $11,513,364 ($11,617,315 as at June 30, 2011).

The Company's capital management objective is to have sufficient capital to be able to meet its exploration activities plan in order to ensure the growth of its activities. It has also the objective to have sufficient liquidity to finance the exploration expenses, the investing activities and the working capital requirements.

The Company is subject to contractual requirements related to the use of funds obtained by flow-through shares financing. These funds have to be incurred for eligible exploration expenses as per the Canadian tax rules and regulations. The Company has no dividend policy.

17. Subsequent event:

(a) On February 13, 2012, the Company purchased a group of 13 claims from Les Ressources Tectonic Inc., of which 8 claims are located on the SNRC 32N/08 and 5 claims are located on the SNRC 32N/09. These claims will be added to the Caumont property. The purchase price was negotiated for a cash payment of $15,000 plus the issuance of 70,000 common shares at a price of $0.18 per share for a value of $12,600 in the capital of the Company. These shares have a holding period of 4 months. The seller keeps a 1% NSR that can be repurchased by the Company at any time for an amount of $1,000,000.
