WWW.MONARQUESRESOURCES.COM

The following management's discussion and analysis (the "MD&A") objective is to help the reader better understand the activities of the Company and the highlights of its financial situation. It explains the financial situation and the results for the first quarter ended September 30, 2012 and the comparison of the Company's statement of financial position as at September 30, 2012, June 30, 2012 and June 30, 2011.

The MD&A has been prepared in accordance with Regulation 51-102 and should be read in conjunction with the audited financial statements of the Company for the fiscal year ended June 30, 2012 and the related notes thereto.

These unaudited condensed interim financial statements and this MD&A have been reviewed by the Audit Committee and approved by the Company's Board of Directors on November 26, 2012. Unless otherwise indicated, all the amounts in this MD&A are in Canadian dollars.

Forward looking statements

Some statements contained in this MD&A, specially the opinions, the projects, the objectives, the strategies, the estimates the intent and the expectations of the Company that are not historical data, are forward looking statements. Such statements can be recognized by the terms "forecast", "anticipate", "consider", "foresee" and other terms and similar expressions. These statements are based on information available at the time they are made, on assumptions established by the management and on the management expectation, acting in good faith, concerning future events and concerning, by their nature, known and unknown risks and uncertainties mentioned herein (see the section Risks and uncertainties). The real results for the Company could differ in an important way of those which state or that these forward looking statements show the possibility for. Consequently it is recommended not to trust unduly these statements. These statements do not reflect the potential incidence of special events which could be announced or take place after the date of this MD&A. Except if the applicable legislation requires it, the Company does not intend to update these prospective statements to reflect, in particular, new information or future events, and it is by no means committed doing so.

Reporting entity and going concern

Monarques Resources Inc. ("The Company"), incorporated on February 16, 2011 under the *Canada Business Corporations Act*, is engaged in the acquisition and exploration of mining properties. Its stock is trading on the TSX Venture Stock Exchange under the symbol MQR. Its activities are in Canada. The Company is an associate of Nemaska Lithium Inc. (Nemaska), a company that trades on the TSX Venture under the ticker NMX and owns 43.27% of the share capital of the Company.

The Company has not yet determined if any of its mining properties contain ore reserves that are economically recoverable.

Although the Company has taken steps to verify title to mineral properties in which it has an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

Reporting entity and going concern (continued)

The recoverability of amounts shown for mining properties and related exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof. As at the date of the financial statements, management determined that the net carrying value of mining properties represents the best estimate of their net recoverable value. This value may nonetheless be reduced in the future.

The funds available to the Company at the end of the year are sufficient to complete its 2011-2012 exploration budget which is expected to be wrapped-up by December 31, 2012. Even though the Company successfully completed in June 2012 a non-brokered private placement amounting to $586,250, the Company will have to seek additional funds during the second half of the fiscal year 2012-2013 in order to secure the funds needed for its 2012-2013 budget for general and administrative expenses and to meet its short term obligations associated with its financial liabilities. Despite the Company's ability to obtain funds in the past, there is no assurance that the Company will be successful in obtaining additional financing with acceptable terms.

On November 1, 2012, the Company signed an offering letter with Industrial Alliance Securities Inc. ("IAS" or he "Agent") to act as lead agent for a proposed private placement through an offering memorandum (the "Offering") of up to $1,000,000 of Flow-Through Common Shares ("FT Shares"), $2,500,000 of Flow-Through Units ("FT Units") and up to $1,000,000 of Units ("Units"). Each FT Shares will be offered at a price of $0.25 per FT Shares for a maximum of 4,000,000 FT Shares. Each FT Units are offered at a price of $1,000 and consist of 3,200 FT Shares at a price of $0.25 per FT Shares, 1,000 common shares (the "Common Shares") at a price of $0.20 per Common Shares and 2,100 warrants of the Company (the "FT Unit Warrants"). Each full FT Unit Warrants entitles its holder to purchase one Common Shares at a price of $0.30 for a period of thirty-six (36) months following the closing date of the Offering. Each Units will consist of one (1) Common Shares at a price of $0.20 per Common Share and one (1) common share purchase warrants (the "Warrants"). Each full Warrant entitles its holder to purchase one Common Shares at a price of $0.30 for a period of thirty-six (36) months following the closing date of the Offering. The Agent will receive a cash commission equivalent to 7.5% of the gross proceeds from the sale of the FT Shares, FT Units and the Units sold pursuant to the Offering. Also, the Agent will receive compensation options entitling them to purchase that number of Common Shares equal to 5% of the total number of FT Shares, FT Units and Units sold pursuant to the Offering, exercisable in whole or in part at the price of the Units for a period of 36 months from the closing of the Offering.

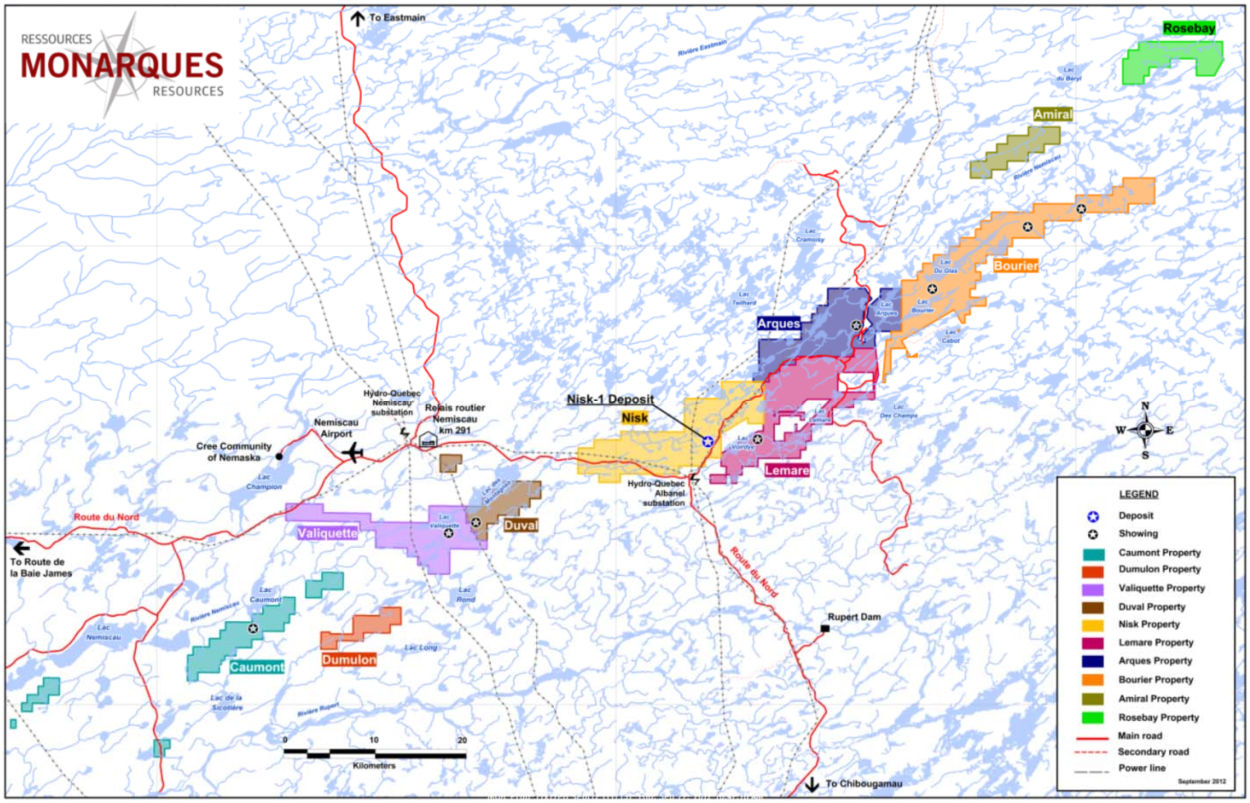
These condensed interim financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") and on the assumption of going concern. The application of IFRS under the assumption of going concern may be inappropriate because the above condition indicate the existence of a material uncertainty which may cast significant doubt on the ability of the Company to continue as a going concern. These condensed interim financial statements do not include adjustments that should be made to the carrying amount of assets and liabilities if the assumption of going concern proves to be unfounded.

Highlights for the quarter ended September 30, 2012, scope of activities and next steps

During the quarter, the Company continued exploration works mostly on the Dumulon and the Lemare properties which resulted in identifying gold bearing structures on the Lemare property. The total exploration expenses during the quarter totalled $285,198 (see note 5 of the audited financial statements for details by properties).

Highlights for the quarter ended September 30, 2012, scope of activities and next steps (continued)

As at the date of this report, the Company owns 10 properties, totalling 1,176 claims, as shown in the following map:



In summary, the main exploration works realized on the Company's properties are as follows, being understood that all work carried out before June 10, 2011, were conducted by the previous owner of the properties, Nemaska Lithium Inc.:

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Amiral	Geological surveys and prospection, June 2012	Confirm the geology and identify on the ground the source of magnetic and electromagnetic anomalies.	Area is mainly composed of metasediment and migmatite. A horizon of massive sulphides may be the source of electromagnetic anomalies. Analytical results to come.
	Heliborne geophysics survey (346 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	A high-resolution heliborne Mag-EM survey covering the entire property was conducted by Prospectair Geosurveys inc. The final report outlines multiple anomalies.

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Arques	Diamond drilling (5 holes totalling 1,004 meters), January 2012	Test radiometric anomalies to identify Rare Earth Elements (REE) mineralization	Rocks from the syenodiorite intrusive complex were recovered. The best REE results are 0.56% Total Rare Earth Oxydes (TREO) over 5.2 meters (hole RUP-12-11).
	Core resampling	Infill gap in mineralized section	The best TREO intersection is from the hole RUP-11-05 and grading 0.75 % over 15.0 meters.
	Track-etching radiometric survey covering the entire intrusive complex (749 reading stations), June 2011	Distinguish Rare Earth Elements, Niobium and Tantalum enriched lithologies.	The results have provided multiple high contrast anomalies.
	Diamond drilling (5 holes totalling 1,496 meters), March 2011	Test magnetic anomalies to identify economic mineralization	Rocks associated with a syenodiorite intrusive complex with anomalies in TREO (values of 0.77% over 2.1 meters, 0.80% over 3.8 meters and 0.59% over 3.1 meters) were encountered.
Bourier	Geological surveys and prospection, June-August 2012	Confirm the geology and identify on the ground the source of numerous magnetic and electromagnetic anomalies.	Area in the North-East extension was covered and sampled. Analytical results to come.
	Mapping and sampling of excavated mechanical trenches, June 2012	Identify mineralized zones.	Two trenches were sampled and mapped. Analytical results to come.
	Diamond drilling (15 holes totalling 2,214 meters), September 2011	Confirm the interpretation of mineralized zones at depth.	Massive sulphide units associated with the known prospective horizon were intersected. The analytical results do not indicate economic mineralization.
	Heliborne geophysics (164 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	A high-resolution heliborne Mag-EM survey covering the 25 newly acquired claims was conducted by Prospectair Geosurveys inc. The final report highlights the continuity of the main high-mag/conductive anomaly.

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Bourier (continued)	Geological surveys and prospection, August 2011	Confirm the geology and identify on the ground the source of numerous magnetic and electromagnetic anomalies.	Areas of interest were covered in the North-East extension of the massive sulphide zone outlined during field work conducted in the summer of 2010 by Nemaska Exploration. The results highlight a zinc and silver prospective trend of Sedex deposit type.
Caumont	Geological surveys and prospection, June-August 2012	Confirm the geology and identify on the ground the source of numerous magnetic and electromagnetic anomalies.	Geological surveys confirm the potential for magmatic Ni-Cu-PGE mineralization and for gold-arsenic mineralization. Analytical results to come.
	Mechanical trenching (five trenches from which 321 rock samples were collected, including 248 channel samples), September 2011	Confirm the interpretation of geophysics at surface and characterize mineralization from historic grab samples.	The results confirm magmatic Cu-Ni-PGE mineralization. Best results from a grab sample are 1.08% Cu, 0.76% Ni, 0.51 g/t Pd. . Best results from channel sampling are 0.63% Cu, 0.43% Ni, 0.06 g/t Pt, 0.58 g/t Pd over 2.5m.
	Heliborne geophysics (482 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	Prospectair Geosurveys inc. conducted a high-resolution heliborne Mag-EM survey covering the entire property. The final report highlights a high-contrast main anomaly.
Dumulon	Geological surveys and prospection, June-August 2012	Confirm the geology and identify on the ground the source of numerous electromagnetic anomalies.	A plurikilometric horizon of massive sulphides in graphitic metasediment may be the source of electromagnetic anomalies. Analytical results to come.
	Heliborne geophysics (376 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	A high-resolution heliborne Mag-EM survey covering the entire property was conducted by Prospectair Geosurveys inc. The final report outlines multiple anomalies.
Duval	Diamond drilling (6 holes totalling 1,338 meters), October 2011	Confirm the continuity of mineralized zones at depth.	Best results are 1.62% Cu, 0.45% Ni, 0.53 g/t Au and 9.85 g/t Ag over 1.0 meter.

MAIN WORKS DONE

Property	Works	Objective	Results
Duval (continued)	Ground geophysics (Magnetometry, 21 linear km), September 2011	Define the geology and identify mineralized zones at surface.	Results highlight a main high-contrast anomaly.
Lemare	Stripping and geochemistry survey, October 2012	Identify a gold bearing structures.	48 grab and channel samples over 100ppb (0.1 g/t), with 12 samples over 1 g/t. The highest grade assayed was 4.76 g/t.
	Geological surveys and prospection, July-August 2012	Confirm the geology and identify on the ground the source of magnetic and electromagnetic anomalies.	Many targets showed a potential for gold-arsenic mineralization. Analytical results to come.
	Diamond drilling (2 holes totalling 498 meters), September 2011	Confirm the interpretation of mineralized zones at depth.	Two exploration diamond drill holes for a total of 498 meters were drilled on two targets identified in the field work carried out in 2009 and 2010 by Nemaska Exploration. Horizons of massive to semi-massive sulfide were encountered on both targets. Analytical results do not indicate economic mineralization.
	Heliborne geophysics (453 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	A high-resolution heliborne Mag-EM survey covering the South sector of the property was conducted by Prospectair Geosurveys inc. The final report outlines multiples anomalies.
Nisk *(West sector)*	Geological surveys and prospection, July-August 2012	Confirm the geology and identify on the ground the source of magnetic and electromagnetic anomalies.	Analytical results to come.
	Mapping and sampling of two excavated trenches, July 2012	Identify mineralized zones.	Analytical results to come.
	Mechanical trenching, two mechanical trenches have stripped approximately 600 m^2 of outcrops on a high mag anomaly, July 2011	Confirm the interpretation of geophysics at surface and identify mineralization.	The stripped outcrops have been cleaned up but will only be sampled during the summer of 2012.

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Nisk *(Nisk-1 deposit)*	Ground geophysics (Magnetometry), July 2011	Define the geology and identify mineralized zones at surface.	During the summer of 2011, a ground magnetometric survey covering 60 linear km was carried out to define a heliborne anomaly.
	Diamond drilling One (1) hole (153 meters), June 2011	Test a positive high contrast magnetic anomaly.	The anomaly has been explained by the presence of magnetite.
	Borehole geophysics (Pulse-EM), November 2011	Identify mineralized zones at depth.	The survey has identified moderate to strong in-hole/edge and/or off-hole responses which indicate the presence of semi-massive to massive mineralization.
	Diamond drilling (9 holes totalling 1,852 meters), November 2011	Characterize potential extension of the main zone and test two new IP axes.	The best results reported are 0.25% Ni over 7.2 meters in the hole TF-79-11; 0.40% Ni over 8.4 meters in the hole TF-80-11; and 0.19% Ni over 16.7 meters in the hole TF-81-11.
	Ground geophysics (Induced Polarization - IP), July 2011	Identify mineralization at depth.	An IP survey covered the entire 3.5 km long magnetic anomaly associated with the Nisk-1 deposit was completed. The results outline the continuity of the IP conductor associated with the deposit and two new axes parallel to it.
	Diamond drilling (2 holes totalling 1,032 meters), February 2011 *by Nemaska Lithium (formerly Nemaska Exploration)*	Test geophysical anomalies	The results reported are 0.34% Ni and 0.13% Cu over 7.75 m in the hole TF-72-11 on a zone containing 5-40% of sulphide.
	Borehole geophysics (Pulse EM), March *2011 by Nemaska Lithium (formerly Nemaska Exploration)*	Identify mineralized zones at depth	The interpretation of a "Pulse EM" survey conducted in one hole on the Nisk-1 deposit indicates a conductivity anomaly within 50m from it.

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Rosebay	Geological surveys and prospection, June 2012	Confirm the geology and identify on the ground the source of numerous magnetic anomalies.	Geological surveys reported the presence of banded iron formation. Analytical results to come.
	Heliborne geophysics (585 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	Prospectair Geosurveys inc. conducted a high-resolution heliborne Mag-EM survey covering the entire property. The final report outlines multiple anomalies.
Valiquette	Geological surveys and prospection, June 2012	Confirm the geology and identify on the ground the source of numerous magnetic and electromagnetic anomalies in the North-West area.	Analytical results to come.
	Borehole geophysics (Pulse EM), November 2011	Identify mineralized zones at depth.	In tree holes, the survey has detected in-hole/edge and off-hole positive responses indicating the presence of strong, but rather moderate to small-size, conductive zones.
	Diamond drilling (5 holes totalling 1,197 meters), October 2011	Confirm the interpretation of mineralized zones at depth.	The best intersections are 0.15% Ni over 25 meters (including 0.20% Ni and 0.27 g/t Pd over 9.5 meters) in the hole VAL-11-13 and 0.20% Ni over 41 meters in the hole VAL-11-12.
	Ground geophysics (Magnetometry, 34 linear km), September 2011	Define the geology and identify mineralized zones at surface.	A ground magnetometric survey covering the main anomaly associated with the mineralized trend drilled in winter 2011, was carried out. It has delineated this high-contrast anomaly.
	Heliborne geophysics (214 linear km), September 2011	Identify mineralized zones at surface and depict the geology.	Prospectair Geosurveys inc. conducted a high-resolution heliborne Mag-EM survey covering 24 newly acquired claims. The final report highlights the continuity of the key anomaly.

MAIN WORKS DONE			
Property	**Works**	**Objective**	**Results**
Valiquette (continued)	Borehole geophysics (Pulse EM), March 2011 *by Nemaska Lithium (formerly Nemaska Exploration)* Diamond drilling (9 holes totalling 1,475 meters), March 2011 *by Nemaska Lithium (formerly Nemaska Exploration)*	Confirm the interpretation of mineralized zones at depth. Confirm the interpretation of mineralized zones at depth.	The results interpretation outlines Ni-Cu mineralization within 50m of the hole VAL-11-07 and an iron formation in hole VAL-11-09. The results outlined a Cu-Ni-PGE mineralization. The best intersection reported is 2.66% Ni and 0.71% Cu over 3.2 meters.

Highlights for the quarer, scope of activities and next steps (continued)

The foreseen main works on the properties are as follows:

MAIN WORKS PLANNED	
Property	**Work**
Amiral	Data compilation and reporting.
Bourier	Data compilation and reporting.
Caumont	Data compilation and reporting. Geophysics, geological surveys, prospecting, trenching and diamond drilling campaign.
Dumulon	Data compilation and reporting.
Duval	Data compilation and reporting.
Lemare	Line cutting (69 km) on Lac de la Sillimanite and Lac de la Chlorite showing. Soil geochemistry compilation and reporting. Data compilation and reporting. Geophysics, geological surveys, prospecting, trenching and diamond drilling campaign.
Nisk	Data compilation and reporting.
Rosebay	Data compilation and reporting.
Valiquette	Data compilation and reporting.

Selected Financial Information

The following table summarizes the Company's selected key financial data taken from the statement of comprehensive loss for the three-month periods ended September 30, 2012 and 2011 as well as the statement of financial position as at September 30, 2012, June 30, 2012 and June 30, 2011.

Statements of comprehensive loss selected financial information			
	Three-month periods ended September 30		
Earnings and comprehensive loss		**2012 ($)**	**2011 ($)**
Interest income		2,616	10,601
Loss before income taxes		100,256	261,118
Net loss and comprehensive loss		143,280	532,118
Loss per share, basic and diluted		0.004	0.017
Statements of Financial Position selected financial information			
	As at		
Earnings and comprehensive loss	**September 30, 2012 ($)**	**June 30, 2012 ($)**	**June 30, 2011 ($)**
Cash and cash equivalents (1)	807,159	1,402,713	5,092,699
Working capital (2)	274,134	399,393	738,030
Total assets	12,435,560	12,738,446	12,988,762
Total liabilities	836,889	1,028,532	1,371,447
Shareholder's Equity	11,598,671	11,709,914	11,617,315

(1) The cash and cash equivalents includes $298,459 ($583,657 as at June 30, 2012 and $4,000,000 as at June 30, 2011) of cash reserved for exploration expenses.

(2) This is a non GAAP measure defined as the current assets excluding the cash reserved for exploration and subscriptions receivable, less the current liabilities excluding the liability related to flow-through shares.

Selected Financial Information (continued)

Statement of financial position

As at September 30, 2012, the total assets of the Company totalled $12,435,560, representing a decrease of $302,886 compared to June 30, 2012. This decrease is directly related to the cash flow used by the operations and to the fact that the Company's short term liabilities decreased by $177,627 (excluding the liability related to flow-through shares of $59,648). These total accounts payable and accrued liabilities are mainly composed of payables related to exploration expenses in the amount of $222,927, while the remaining balance of $101,264 are attributable to other payables and accrued liabilities such as compensation and audit fees.

Despite the June 20, 2012 private placement, the Company will have to seek additional funds during the second half of the fiscal year 2012-2013 in order to secure the funds needed to sustain its 2012-2013 budget for general and administrative expenses and to meet its short term obligations associated with its financial liabilities.

Operating results for the first quarter ended September 30, 2012

Condensed Interim Statements of Comprehensive Loss
(Unaudited)

Periods ended September 30, 2012 and 2011

	2012	2011
	$	$
Expenses:		
Compensation	67,676	66,254
Share-based payments	32,037	338,710
Rent, office expenses and other expenses	14,625	29,355
Registration, listing fees and shareholders' information	5,594	7,970
Promotion and advertising	620	12,193
Representation, missions and trade shows	68	13,242
Consultant fees	26,279	24,440
Professional fees	12,481	19,728
Total expenses	**159,380**	**511,892**
Net finance expense (income):

Finance expense	532	708
	(2,084)	**(9,893)**
Loss before income taxes and following items	**157,296**	**501,999**
Other income related to flow-through shares	(57,040)	(240,881)
Loss before income taxes	**100,256**	**261,118**
Deferred income tax expense	43,024	271,000
Comprehensive loss for the period	**143,280**	**532,118**
Basic and diluted loss per share	0.004	0.017
Weighted average number of shares outstanding	36,660,100	31,835,970

Operating results for the first quarter ended September 30, 2012 (continued)

The results for the quarter show a loss before income tax and other items of $100,256 ($261,118 for the same period in the previous year) as seen in the above table. Aside from interest revenues of $2,616, the Company has no revenues from operations.

As seen in the above statement of comprehensive loss, the main variations between the current period and the previous year comparative figures are: i) share-based payments, a non-cash item, decreased by $306,673 due to less options issued this year compared to last year; ii) promotion and advertising decreased by $11,573 and a decrease of $13,174 in representation, missions and trade shows which is directly related to a halt of activities in these expense items; iii) the professional fees have decreased by $7,247 mainly due to higher costs on the transition to change auditors last year.

During the quarter, the cash flow used by the operating activities amounted to $247,495, mainly due to the decrease in the accounts payables and accrued liabilities and to cover the operating expenses.

Financing activities for the first quarter ended September 30, 2012

During the quarter, the Company hasn't completed any additional financing.

Investing activities for the first quarter ended September 30, 2012

During the quarter, the cash flow used by the investing activities totalling $348,059 was for exploration and evaluation assets, net of the variation during the period in the accounts payables and accrued liabilities amounting to $62,861.

The details for the total exploration and evaluation expenses done during the three-month period that ended on September 30, 2012 on each property are presented in the following table:

Selected quarterly data

Operating results for each of the last 6 quarters are presented in the table below. The Company's management is of the opinion that the data related to these quarters were prepared in the same manner as that of the audited financial statements for the fiscal year ended June 30, 2012.

Operating results as at:	Finance income ($)	Loss (profit) before income taxes ($)	Comprehensive loss ($)	Loss per share – basic and diluted ($)
September 30, 2012	2,616	100,256	143,280	0.004

As at September 30, 2012, the Company had issued 7,290,000 exercisable warrants to shareholders and 910,000 exercisable warrants to brokers. Each warrant allows its holder to subscribe 1 common share at a price varying between $0.20 per share to $0.45 per share for a period of 24 months following their issue date.

Related Party Transactions and Commercial Objectives

During the first quarter that ended September 30, 2012, the Company incurred expenses for services rendered by executive officers of the Company. These services were rendered in the normal course of operations and are measured at the exchange amount, which is at cost, and which is the amount agreed between the parties.

First quarter ended September 30		
	2012 ($)	**2011 ($)**
Salary and fringe benefits paid to key management personnel	39,112	40,625
Share-based payments paid to key management personnel	11,061	131,207
Fees and expenses towards the external directors	14,000	12,083
Share-based payments towards the directors	15,340	186,420

Related Party Transactions and Commercial Objectives (continued)

Inter-company transactions carried out during the period between the Company and the entity having significant influence, Nemaska, totalled a net amount of $173,602 (excluding sales tax), split as follows: $227,209 of exploration and evaluation assets charged by the Company to Nemaska, while Nemaska charged to the Company for the following: $46,334 of compensation and $7,273 as general administrative and office expenses.

The transactions are in the normal course of operations and are measured at the exchange amount, which is at cost, and which is the amount of consideration established and agreed to by the related parties. The inter-company balance receivable by the Company from Nemaska as at September 30, 2012, totalled $41,054 (payable of $71,982 to Nemaska as at June 30, 2012) and is included in the other receivables (accounts payable and accrued liabilities as at June 30, 2012).

Off Balance sheet agreements

The Company has not concluded any off balance sheet agreements.

Obligations and contractual commitments

The Company had the following commitments as at the date of this report:

Arques, Bourier, Lemare and Nisk properties (previously Lac Arques)

Upon the acquisition of the properties, the Company took in charge 100% of an agreement on a group of 396 claims included in the Lac Arques property in the province of Québec. Upon the properties restructuration, these 396 claims related to this commitment were assigned as follows: 109 claims to the Arques property, 142 claims to the Bourier property, 98 claims to the Lemare property and 47 claims to the Nisk property. During the year that ended June 30, 2012, 47 claims related to the Bourier property in relation to this commitment were abandoned, resulting in a remaining total of 349 claims related to this commitment.

As part of this agreement, the Company has agreed to pay to one of the seller a maximum of $1,000,000, conditional on the achievement of certain stages of works and results on the claims acquired under the Lac Arques Purchase and Sale Agreement, which are defined as follows:

- $150,000 if and when the Company will have completed exploration work corresponding to a cumulative minimum amount of $5,000,000 on the property;
- $300,000 upon obtaining an independent pre-feasibility study; and
- $500,000 upon obtaining an independent feasibility study confirming that the property can support commercial production.

Obligations and contractual commitments (continued)

Arques, Bourier, Lemare and Nisk properties (previously Lac Arques) (continued)

As at June 30, 2012, cumulative exploration expenses totalling $2,847,067 ($2,818,306 as at June 30, 2012) were done on the properties, of which $1,911,404 is included in the acquisition costs of the properties. This cumulative amount must be taken into consideration in the calculation of the minimum exploration work to be carried out to reach the trigger level of payments.

A 3% NSR will be payable to the initial sellers under the Lac Arques Purchase and Sale Agreement in case of a commercial production of all metals extracted from the or part of the 396 claims. However, the Company shall have the option at all time and until the expiration of a period of 3 months following the official production statement to repurchase 1% NSR from the vendors, proportional to their interest therein subject to the payment of an amount of $1,000,000 payable in two equal and consecutive instalments; the first instalment being payable upon the date of exercise of the option to repurchase part of the NSR and the second at the latest 90 days following the date of payment of the first instalment.

Arques / Lemare / Nisk (previously Lac Levac):

Upon the properties restructuration in June 2011, 150 claims related to this commitment of the Lac Levac property were assigned as follows: 1 claim to the Arques property, 83 claims to the Lemare property and 66 claims to the Nisk property. Pursuant to a net smelter return agreement dated January 15, 2010 (the “Net Smelter Return Agreement”); the initial seller has retained a 2% NSR, of which a 1% NSR can be repurchased by the Company for an amount of $1,000,000 within the first three years.

In addition, the Company has undertaken, should it receive a good-faith offer from a third-party for any of the Nisk property claims, not to dispose of any such Nisk claims without having entitled the initial seller to purchase such Nisk claims at the price of such offer, pursuant to a right of first refusal agreement dated January 15, 2010 (the “Right of First Refusal Agreement”).

Caumont, Duval and Valiquette properties (previously Lac des Montagnes)

From the 279 claims forming the Lac des Montagnes property, 197 of them have been designated before November 2008 as being subject to a 2% NSR, of which a 1% NSR can be repurchased by the Company for an amount of $1,000,000 within the first three years to be paid in favor of the initial seller. Upon the properties restructuration, these 197 claims related to this commitment were assigned as follows: 19 claims to the Caumont property, 56 claims to the Duval property and 122 claims to the Valiquette property. Furthermore, the initial seller keeps a right of first refusal should the Company receive a good-faith offer from a third-party for any of the 197 claims to purchase such claims at the price of such offer.

In addition, pursuant to an acquisition agreement dated October 28, 2010, for 24 claims forming part of the Lac des Montagnes property (part of the Caumont West block) these claims are subject to a 1.5% NSR payable in favor of the initial seller. 1% of that NSR can be repurchased at all time and until the expiration of a period of 3 months following the official production statement, subject to the payment of an amount of $1,000,000 payable in two equal and consecutive instalments; the first instalment being payable upon the date of exercise of the option to repurchase part of the NSR and the second at the latest 90 days following the date of payment of the first instalment.

Obligations and contractual commitments (continued)

Caumont, Duval and Valiquette properties (previously Lac des Montagnes) (continued)

Furthermore, pursuant to an acquisition agreement between the Company and Les Ressources Tectonic Inc. finalized on March 29, 2012, 13 claims were added to the Caumont property. In consideration for the claims, the Company paid to the seller $15,000 in cash and issued 70,000 common shares in the capital of the Company for an amount of $10,500. These common shares are subject to a 4-month hold period. The claims are subject to a 1% NSR, which can be repurchased at any time by the Company for an amount of $1,000,000 to be paid in favor of the seller.

Arques

On September 28, 2011, the Company acquired ten (10) mining claims known as "the North Rupert Block", which were held by the seller. These mining claims are located in the Province of Québec and are enclosed in the Arques property owned at 100% by the Company.

On October 12, 2011, the Company paid to the seller $5,000 in cash and issued 50,000 common shares in the capital of the Company for an amount of $12,000, as a consideration for the claims acquired.

Also, the Company has agreed to pay the seller 1.5% NSR if any of the claims comprising the North Rupert Block are brought into production. The Company has the right, at any time, to purchase 0.5% of the NSR by paying the seller the sum of $500,000 in cash.

Valiquette

On July 14, 2011, the Company purchased three (3) mining claims located to the west of the Valiquette property. Conditional to reaching a certain number of meters of diamond drilling on the claims, the Company has also agreed to pay to the seller an additional amount of a maximum of $60,000 and to issue a maximum of 500,000 additional units, in equal portions of $15,000 and 100,000 units, every 3,000 meters of diamond drilling on the claims, starting from 3,000 meters.

The exercise price of the warrants at the date of granting will be established as the weighted average price of the common shares on the TSX Venture Exchange during the period of 30 calendar days following the reaching of said number of meters. This commitment is in force as long as the claims remain in good standing. Also, the Company has agreed to pay to the seller a 2% NSR on all metals from the acquired claims. The Company has the right, at any time until the expiration of the 3 month-period following the official production statement, to purchase 1% of the NSR by paying to the seller the sum of $1,000,000 in cash.

Flow-through shares

The Company is committed to incur eligible exploration and evaluation expenses, pursuant to the Canada *Income Tax Act* and Québec *Taxation Act*, of $4,000,000 by December 31, 2012, and to transfer the tax deductions related to these expenditures to the subscribers of its flow-through share underwriting completed on June 10, 2011. As at September 30, 2012, the Company had incurred $3,701,541 of eligible expenses ($3,416,343 as at June 30, 2012) and had funds reserved for exploration amounting to $298,459 ($583,657 as at June 30, 2012).

Additional information required from junior issuers with no significant income

The Company reports the information on its exploration and evaluation assets in note 5 of its unaudited condensed interim financial statements for the period that ended September 30, 2012.

The Company has no research and development expenses.

The Company has no other deferred expenses than those related to its mining properties and explorations & evaluation assets.

The office and general administrative expenses for the first quarter ended September 30, 2012 as well as the same period for the previous year are composed of the following expenses:

Rent, office and other expenses for the first quarter ended September 30		
	2012 ($)	**2011 ($)**
Mining claims	-	5,675
Office supplies and mailing	3,620	1,447
Insurances, taxes and permits	5,196	3,629
Office and equipment lease and maintenance	4,396	9,011
Telecommunications	1,413	1,774
Training, HR activities and other expenses	-	7,819
Total	**14,625**	**29,355**

Financing sources

The financing sources since March 31st, 2011 up to the date of this report are listed in the following table:

Date	Type	Financings	Amount ($)	Use of proceeds
June 20, 2012	Private placement	Common shares	586,250	General administrative expenses and mining properties acquisition.
June 10, 2011	Prospectus, Initial public offering	Common shares	2,000,000	General administrative expenses and mining properties acquisition.
		Flow-through shares	4,000,000	Exploration work on the properties owned by the Company.

SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Basis of presentation

(a) Statement of compliance:

These condensed interim financial statements have been prepared in accordance with IFRS.

The accounting policies applied in these condensed interim financial statements are based on IFRS issued and in effect as of November 26, 2012, the date on which the Board of Directors approved these condensed interim financial statements.

(b) Basis of measurement:

The condensed interim financial statements have been prepared on the historical cost basis.

(c) Functional and presentation currency:

These condensed interim financial statements are presented in Canadian dollars, which is the Company's functional currency.

(d) Use of estimates and judgments:

The preparation of the condensed interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

- Notes 4 and 5 - recoverability of mining properties and exploration and evaluation assets;
- Note 7 - fair value of share-based payment and warrants;
- Note 13 - recoverability of deferred income tax assets.

Significant accounting policies:

The condensed interim financial statements for the period ending September 30, 2012 have been prepared following the same accounting policies used in the audited financial statements for the years ended June 30, 2012 and 2011.

Properties titles

According to the mining law and regulations of the Province of Quebec, the Company, to renew its claims, must do a minimum of exploration expenditures and pay to the Quebec government, a rent per claim, for every 2 year renewal period. The next renewals to come between the date of this MD&A and June 30, 2013 covers 287 claims. While most of the required exploration expenditures as already been done for the renewal of most of these claims for an additional 2 year period, an amount of $26,850 will have to be filed with the “Ministère des Ressources Naturelles et de la Faune”, and mining rights in the amount of $20,356 will have to be paid.

Additional financing

In the future, additional funds will be required to finance the exploration or development work on the Company's properties, to pay for the renewal of the claims forming the properties and to cover the costs of managing the Company. The main sources of funds available to the Company are the issuance of additional shares, the borrowing of money or the sale of interests in its properties. There can be no assurance that the Company will be successful in its efforts to arrange additional financing on terms satisfactory to the Company.

Conditions of the industry in general

The exploration and development of mineral resources involves significant risks that even an allied neat evaluation with experiment and know-how cannot avoid. Although the discovery of a deposit can prove extremely lucrative, few properties where exploration and development work are carried out become producing mines thereafter. Important expenditures are necessary to establish ore reserves, to work out the metallurgical processes and to build the mining plant on a particular site. It is impossible to provide assurance to the effect that the exploration and development programs contemplated by the Company will generate a profitable mine.

Economic viability of a mineral deposit depends on many factors, of which some are due to the particular characteristics of the deposit, in particular its size, its content and its proximity with the infrastructures as well as the cyclic character of the prices of metals and the governmental regulations, the royalties, the limits of production, the import and export of minerals and the protection of the environment. The impact of these factors cannot be evaluated in a precise way, but their effect can make so that the Company does not provide an adequate return of the funds invested.

The mining activities comprise a high level of risks. The activities of the Company are subject to all the dangers and the risks usually dependent on the exploration and the development, including the unusual and unforeseen geological formations, explosions, collapses, floods and other situations which can occur during drilling and the removal of material and of which any could cause physical or material or environmental injuries and, possibly, legal responsibility.

Governmental regulation

The activities of the Company are subject to various federal, provincial and local laws, which relate to the exploration and development, taxes, standards of work, diseases and the occupational safety, the safety in mines, toxic substances, the protection of the environment and others. The exploration and the development are subject to legislative measures and lawful with the federal, provincial and local levels relating to the protection of the environment. These laws impose high standards on the mining industry, in order to control the rejects of waste water and to force the participants to account for such controls to the lawful authorities, to reduce or eliminate the impact that are generated by certain production activities; extraction and of treatment and which are later on deposited on the ground or are rejected into the air or the water, to complete work of restoration of the mining properties, to control dangerous waste and materials and to reduce the risk of industrial accidents. The defect to conform to the above-mentioned legislative measures can involve important fines and other penalties.

Risks of lawsuits and no insurable risks

The Company could be held responsible for pollution or for other risks against which it could not be insured or against which it could choose not to be insured, being given the high cost of the premiums or for other reasons. The payment of sums in this respect could involve the loss of the assets of the Company.

Conflicts of Interest

Some of the directors and officers of the Company are engaged as directors or officers of other corporations involved in the exploration and development of mineral resources. Such engagement could result in conflict of interest. Any decision taken by these directors and officers and involving the Company will be in conformity with their duties and obligations to compromise in an equitable way and in good faith with the Company and these other corporations. Moreover, these directors and officers will declare their interest and will abstain to vote on any question which could give place to a conflict of interest.

Permits, licences and authorizations

The activities of the Company require obtaining and maintaining permits and licences from various governmental authorities. The Company considers that it holds all the permits and licences required for its activities; it currently carries on, in accordance with the relevant laws and by-laws. Changes brought to the by-laws could affect these permits and licence. Nothing guarantees that the Company can obtain all the permits and all the necessary licences in order to continue its mining activities, to build mines or mining plants and to begin the exploitation of its exploration properties. Moreover, if the Company begins the exploitation of an exploration property, it will have to obtain the necessary permits and licences and to conform to all the required obligations concerning the use of water, removal of waste etc. It cannot be guaranteed that the Company will be able to obtain these permits and licences, nor that it will be able to conform to their requirements.

Dependence on the management

The Company is dependent towards certain persons of its management. The loss of their services could have an unfavourable impact on the Company.

Territorial claims

The properties in which the Company holds an interest are not currently subject to territorial claims on behalf of first nations. No insurance can however be provided to the effect that such will not be the case in the future.

Price of metals

The price of the common shares, financial results of the Company like its exploration and development activities; could undergo in the future, important negative effects because of the fall of the prices of metals, resulting in an impact on the capacity of the Company to finance its activities. The prices of metals fluctuate in an important way and are tributary to various factors which are independent of the will of the Company, such as the sale or the purchase of metals by various brokers, central banks and financial institutions, the rates of interest, foreign exchange rates, the rates of inflation, of deflation, the fluctuations in the value of the Canadian dollar and the currencies, the regional and world offer and demand, the economic conjuncture and policy which prevails in the countries of the world which are large metal producers. The prices of metals largely fluctuated these last years and any serious fall could prevent the continuation of the development activities of the properties of the Company.

Additional Information and Continuous Disclosure

This MD&A was prepared as of the date shown in the header of this document. Additional information relating to the Company, including the technical reports mentioned herein and the Company's Annual Information Form, can be found on the website www.sedar.com and on our website at www.monarquesresources.com.
