MONARQUES ACQUIRES 100% OF THE SIMKAR GOLD PROJECT

Quebec City, Quebec, Canada, June 6, 2014 – MONARQUES RESOURCES INC. (“Monarques” or the “Corporation”) (TSX-V: MQR) (FRANKFURT: MR7) is pleased to announce that it closed a transaction today giving it a 100% interest in the [Simkar gold project](#). The property is located 20 km east of Val-d’Or, Quebec, in the heart of the Abitibi Greenstone Belt.

“We are proud to be the sole owners of all our properties in Eastern Val-d’Or,” said Jean-Marc Lacoste, President and Chief Executive Officer. “We are constantly on the lookout for innovative ways to develop the Corporation while minimizing our capital outlay. This transaction allows us to consider the possibility of a joint venture to develop the full potential of the Simkar project.”

Monarques notes that its Simkar, Tex-Sol, Regcourt and Plator I to V properties are nevertheless subject to a 1.5% NSR, with one-third of this royalty (0.5%) redeemable by the Corporation for \$1 million. These properties are all located east of Val-d’Or, and together comprise 302 mineral claims covering a total area of 61 km².

Simkar

The Corporation acquired an initial 50% interest in the Simkar project in the fall of 2013 under the terms of an option agreement signed with Eoro Resources Ltd. (TSX-V: ELO) (Monarques press release dated August 8, 2013). As at May 30, 2014, the Corporation had a 57% interest in the property while its partner held 43%. This new agreement now gives Monarques a 100% interest in the Simkar gold project.

The property is the site of the old Louvicourt Goldfield mine. The gold occurs in a gold-bearing, fault-fill and extensional quartz vein system characteristic of the gold deposits in the Val-d’Or mining district. The project covers an area of 4.05 km² and consists of two mining concessions plus 11 mineral claims. A new mineral resource estimate was prepared for the project in October 2013.
